<sup>2)</sup> The conductor temperature of the laminated copper bar is derived by adding the ambient temperature and the temperature increase together

#### Example:

3565.005 carrying 180 A, i.e. the temperature increases by 30 K. At an ambient temperature of 35°C, this produces a resultant conductor temperature of 35°C + 30 K = 65°C.

# Connection components for Maxi-PLS/Flat-PLS

## For air circuit-breakers and busbar connections

For connecting air circuit-breakers (ACB) to Maxi-PLS/Flat-PLS busbar systems in TS enclosures. Alternatively, for connecting main and distribution busbar systems and for connecting horizontal and vertical main busbar systems.

Please include the design code of the specification given below in the order text for your connector kit.

We recommend the **Rittal Power Engineering software 3020.500 from Version 6.1** for easier configuration of the connector kits and connection brackets, see page 377.

### Material:

- E-Cu

### Note:

- Please quote the complete design code on all enquiries and orders.
- For configuration with the Rittal Power Engineering software, 2 check numbers are additionally output with a hyphen.

### Also required:

- M10/M12 screw connections, see page 359
- Terminal studs Maxi-PLS, see page 355
- Screw connections Flat-PLS, see page 359
- Copper spacer rolls, page 374
